May 31st (Sun.) is "World No Tobacco Day" [5月31日(日)は世界禁煙デー]

Cigarette smoke contains many harmful substances, and when considering the risks of secondhand smoke and nicotine addiction, smoking is not merely a matter of personal preference but a health issue. Therefore, tobacco control measures are a critical priority in the prevention of lifestyle-related diseases.

In Japan, the week beginning with "World No Tobacco Day" (May 31 (Sun.) through June 6 (Sat.)) is designated as "No Smoking Week", during which we conduct public awareness campaigns to encourage people to quit smoking and prevent secondhand smoke exposure. Quitting smoking reduces the risk of tobacco-related diseases.

If you would like support in quitting smoking, please feel free to contact us.

For details, please contact the Health Promotion Division (Kenko Zukuri-Ka) at ☎ext. 518.
